

ALZHEIMER'S DISEASE

There are 5 separate and devastating dementia conditions that affect the quality of mental health of people around the globe. The most common one today is Alzheimer's Disease. Other conditions include vascular dementia, Lewy Body dementia, mixed dementia and fronto-temporal dementia. Refer to my book *The Magic of Pranic Healing* (8th edition) for other treatments that can assist if your client has one of the other 4 causes of dementia.

This disease is also called Type III diabetes and is becoming increasingly prevalent worldwide. It affects all strata of society and often results in family breakdown, due to the need to have their loved ones placed in care facilities. *Basically, Alzheimer's is caused by inflammation and oxidative stress.*^{1,2} Our refined diet, and a lack of daily exercise, have contributed to a range of health conditions that are limiting our quality of life.

ALZHEIMER'S TREATMENT

1. Perform the Horne Invocation and protocol supplied (p6). This is important!
2. Perform a Parasite, Virus and Fungus treatment (appendix B).
3. Stabilise the body with LWB.
4. Now follow on with the ajna treatment to further fortify the procedure. Instructions for this process are given on p3-4.
5. Sweep the ajna chakra with 100 ELV.
6. Energise the ajna chakra with 150 ELV, willing the ELV energy to:
 - regenerate all damaged brain tissue, their central nervous system and all nerve connections, so they can connect, organise and process information normally;
 - harmonise and normalise the lymphatic system and blood vessels in their brain so they can deliver nutrients and remove all waste products;
 - harmonise and normalise their cognitive ability, recognition and communication skills, emotional responses and behaviours so they are calm, can recall both short and long term memories and can manage their own self-care and daily tasks;
 - stimulate their thymus gland to produce sufficient T-lymphocyte cells A, B, 1 and 2 to kill every parasite, virus, fungus and all foreign bacteria in their body; and
 - harmonise and normalise every cell, every organ and every chakra in this person's body.Now, now, now!! So be it.
7. Stabilise the body with LWB.
8. Perform a closing invocation (appendix A).
9. Release the projected energy.
10. Advise the patient to take the supplements I have given in the table on page 9.
 - Modifilan³ detoxifies heavy metals and toxins from the body and brain. -
 - Beta Glucan builds up their immune system.
 - Centrophenoxine assists in repairing their brain. This may require a doctor's prescription.
 - Frankincense oil protects the nervous system and enhance blood flow to the brain. Refer to appendix F for the application points.

Repeat this treatment 3 times a week to alleviate the Alzheimer's condition.
